1 [HOTTest: A model-based test design technique for enhanced testing of domain-specific applications](#)

Avik Sinha, Carol Smidts

 July 2006 **ACM Transactions on Software Engineering and Methodology (TOSEM)**, Volume 15 Issue 3

Publisher: ACM

 Full text available: [pdf\(1.40 MB\)](#)

 Additional Information: [full citation](#), [abstract](#),
[references](#), [index terms](#)

Model-based testing is an effective black-box test generation technique for applications. Existing model-based testing techniques, however, fail to capture implicit domain-specific properties, as they overtly rely on software artifacts such as design ...

Keywords: Haskell, HaskellDB, Test case generation, database-specific test case generation, domain-specific languages, domain-specific testing, model-based testing, test generation tools

Passive monitoring or testing of complex systems and networks running in the field can provide valuable insights into their behavior in actual environments of use. In certain contexts, such as network management and intrusion detection for security, ...
